PROFESSIONAL SUMMARY

Result-driven and highly analytical Full Stack / Frontend Developer dedicated to architectural engineering, data optimization, and crafting smooth, responsive single-page user experiences. Combines a solid foundation in modern client-side architectures like React.js and JavaScript with server-side proficiency in building RESTful routing pipelines using Node.js, Express, and relational MySQL systems. Proactive problem solver skilled at translating complex UI design concepts from Figma into clean, production-grade applications.

TECHNICAL SKILLS

Frontend Web Stack	React.js, JavaScript (ES6+), jQuery, AJAX, HTML5, CSS3, Flexbox/Grid, Material-UI (MUI), Bootstrap, Responsive UI/UX Architectures.
Backend Architecture	Node.js, Express.js (RESTful Routing, Custom Middleware Systems), PHP, Environment Configurations.
Databases & Tools	MySQL, Relational Queries Validation, Git Version Control, GitHub Workflow Deployment pipelines.
Design Utilities	Figma, Vector Image Processing, Adobe Illustrator, Canva.
Core Soft Skills	Analytical Mindset, Technical Problem-Solving, High Adaptability, Attention to Detail, Creative Strategy, Collaborative Communication.

TECHNICAL PRODUCTION PROJECTS

FitLife Hub — Comprehensive Fitness Ecosystem

React.js, JavaScript, Custom Hooks Interaction, Material-UI Layout Architecture

Engineered an expansive single-page fitness application handling active search lookup and filtering queries for over 1,200 unique routines. Integrated clean user viewport appearance reveal tracking states, fully fluid image carousel stack decks, and embedded layout sliders to maximize performance and data accessibility.

FitnessLife RESTful API Engine

Node.js, Express Framework, CORS Integrations, Render Cloud Services Deployment

Architected a production-ready server engine routing framework mapping 11 distinct query parameters and filters to distribute raw databases arrays. Built targeted logic blocks applying advanced ES6 arrays operations to serve structured dynamic items collection text responses, unique gear categorization strings, and complex equipment affiliate systems tables objects. Deployed securely with custom static public folders and clean frontend endpoint query rules permissions.

TradeVibe – Advanced Multi-Vendor E-Commerce

JavaScript Core, PHP Server Logic, AJAX Asynchronous Communications, MySQL DB Layer

A high-performance, full-stack multi-vendor marketplace engineered with Object-Oriented PHP, MySQL, and Vanilla JavaScript. Features a secure multi-role session gateway separating Root Admins, Vendors, and Buyers. Includes dynamic currency routing, real-time discount parsing matrices, and an integrated warehouse inventory management system with automated stock synchronization layers.

Unka Dent — Specialized Clinic Interface

HTML5 Semantic Elements, Specialized CSS Keyframe Animations, Figma Vectors Engine

Crafted a fully responsive custom layout platform showcasing dynamic appointment booking flows. Created custom vector medical indicators assets built natively inside Illustrator and customized in Figma, integrating subtle continuous CSS vector path scaling animations metrics to elevate aesthetic retention values.

Tic Tac Toe Game

HTML5 Semantic Elements, Specialized CSS Keyframe Animations, Figma Vectors Engine

'Tic Tac Toe' is a game developed using HTML, CSS, and vanilla JavaScript. Before starting, players select the number of games to be played, after which the selection is locked, and the game begins. As each game is completed, the results are recorded in a table displayed on the right-hand side. After each game, the 'Next Game' button is activated, allowing players to progress through their chosen number of games. Once all games have been played, the 'Next Game' button changes to 'Show Result,' which, when clicked, reveals the final score of the session.

ACADEMIC BACKGROUND

Graduate of Electrical Engineering and Information Technologies

Ss. Cyril and Methodius University in Skopje — Faculty of Electrical Engineering (FEIT)
2005-2010

CERTIFICATES

Diploma: Web Developer Bootcamp

Udemy
2021

Diploma: Web Development

Shaw Academy
2019
