

BLAGOJA SARKISJAN

About Me

I am a passionate and detail-oriented Web Developer with a background in system engineering and over 14 years of experience in problem-solving and technical systems management. For the past 6 years, I have been expanding my expertise into web development, focusing on creating responsive and user-friendly websites. My strengths include strong analytical skills, adaptability, and a commitment to lifelong learning.

PROJECTS

FitLife Hub

Live: www.fitlifelifehub.net

- Built a fitness platform using React for the frontend and an API with Node.js and ExpressJS.
- The platform features 1,300+ exercises with GIFs, targeted muscles, and detailed instructions.
- Created a responsive design to ensure usability across devices and added tools like a BMI calculator and supplementation guidance for a comprehensive user experience.

Unka Dent Website

<https://sarkisjan.github.io/Unka/>

- Designed a responsive website for a dental office using HTML and CSS.
- Features include an animated logo, a burger menu for smaller devices, and a prominent button directing users to an appointment booking form.
- Showcases services with animated icons linking to detailed descriptions, and a stylized footer with custom-designed contact and social media icons.

Tic Tac Toe Game

<https://sarkisjan.github.io/TicTacToeGame/>

- Developed a Tic Tac Toe game using HTML, CSS, and vanilla JavaScript.
- Players select the number of games before starting, with results tracked in a table after each match.
- Features a 'Show Result' button to display the final score after all games are completed.

Product Management App

<https://bazeproducts.000webhostapp.com/index.php>

- Developed a dynamic product management application using JavaScript, AJAX, PHP, and MySQL.
- Features include adding, categorizing, and deleting products efficiently, with unique specifications per product type.
- Implemented mass deletion via checkboxes and ensured SKU uniqueness through database validation.
